

PROFESSIONAL SUMMARY

Full Stack Developer skilled in React.js, Angular, Node.js, and MongoDB. Experienced in building live projects, integrating APIs, and developing AI-driven features. Seeking to leverage my skills in a collaborative tech environment.

SKILLS

Front-end:

HTML JavaScript | React.js | Next.js | CSS | Angular | Tailwind CSS

Back-end:

Node.js | Express.js | Python

DATABASES:

MongoDB | SQL.

EDUCATION

Bachelor Of Computer Application

Goa University – Dnyanprassarak Mandal's College
Year of Completion: 2023

Higher Secondary School Certificate (HSSC)

Dnyanprassarak Higher Secondary School, Goa Board
Year of Completion: 2020

Secondary School Certificate (SSC)

Dnyanprassarak Vidyalaya, Goa Board
Year of Completion: 2018

EXPERIENCE

React-Node.js Intern

Gytworkz – November 21, 2023 – April 8, 2024

Worked on multiple production-level projects as a full-stack developer, actively contributing to both feature development and maintenance of the company's main job portal product with the core engineering team.

Key Projects & Contributions

- **AI-Powered Medical Motion Tracking**
- Integrated XtraVision.io for real-time skeletal tracking, reducing assessment time by 30%.
- Built a secure video interface using React.js, WebRTC, and Twilio, improving session **efficiency by 25%**.
- Developed backend services in Node.js/Express.js to process video data and maintain logs.
- **Interview Slot Booking**
- Designed a calendar UI with React.js and Day.js, reducing booking errors by **35%** and streamlining scheduling.

- **Live Video Calling Feature**
- **Engineered** a WebRTC-based video call system with **Twilio** token auth and Express.js backend, enabling real-time, secure communication.
- **AI-Based Resume Processing**
- **Integrated AI resume parser** with React.js and Multer, extracting skills and storing results in MongoDB.
- **Streamlined** resume screening by automating data extraction, reducing manual effort by 60%.
- Used **Multer** for file handling and stored data in MongoDB.
- **Job Portal.**
- Assisted in **frontend development** using React.js and AngularJS. Handled state with Redux Thunk, styled with Tailwind CSS, validated forms using Formik/Yup, and supported Next.js integration for SSR.

Technologies Used: React.js, AngularJS, Node.js, Express.js, MongoDB, Redux, Redux Thunk, WebRTC, Twilio, Formik, Yup, Tailwind CSS, Multer, Next.js

SDE-1 Full-stack developer

Insdr Enterprise Solutions— March 17, 2025 – present

- **Project: Lead Generation Platform**
- **Engineered** responsive web pages using **Next.js**, **React.js**, and **Tailwind CSS**, **optimizing performance** and enhancing user experience across devices.
- **Built backend services** with Node.js to automate lead processing, reducing manual effort **by 40%** and increasing system efficiency.
- **Extracted** actionable lead insights by scraping HTML-embedded JSON data using Python and Node.js, streamlining data collection for marketing workflows.
- **Integrated** frontend with **backend APIs** to ensure seamless, real-time data flow and accurate rendering on the UI.
- **Developed an AI-powered chatbot** using **Python**, **FastAPI**, and **LangGraph** to handle user queries and **automate lead qualification**, resulting in improved response times and **higher engagement rates**.
