📞 9730658857 ✉️: [sahilkhattal7@gmail.com](mailto:sahilkhattal7@gmail.com) 🌐: [www.linkedin.com/in/sahil-khattal-2a46b6236](https://www.linkedin.com/in/sahil-khattal-2a46b6236) 📍 Goa, India

## Skills

**Languages:** JavaScript, Python, TypeScript, SQL

**Technologies & Tools:** React.js, Next.js, Node.js, Express.js, REST APIs, MongoDB, AWS (EC2, S3), Redux/Redux Toolkit, Tailwind CSS, Twilio, Angular, GitHub

## Work Experience

**Role:** Full Stack Developer | **Company:** Insdr Enterprise Solutions | **Duration:** July 2024 - Present

### Lead Generation Platform (Real Estate & LinkedIn Leads)

- **Reduced** manual lead processing by **40%** by building an automated pipeline for ingestion, validation, deduplication, and routing of Real Estate and LinkedIn leads.
- **Built and deployed** a full-stack lead management platform using Next.js, React.js, and Node.js on AWS to process and manage lead data.
- **Developed an AI-powered lead** qualification service using **Python, FastAPI, and LangGraph** to automate lead analysis and customer engagement.
- **Built Python-based** web scraping pipelines using **BeautifulSoup** and CSS selectors to extract and structure Real Estate and LinkedIn lead data.
- Deployed Node.js backend services on **AWS EC2 and integrated Amazon S3** for lead-data storage.
- **Technologies:** Next.js, React.js, Node.js, Python, FastAPI, LangGraph, REST APIs, AWS (EC2, S3), BeautifulSoup, Tailwind CSS

### AI-Driven Real Estate Intelligence Dashboard — *Frontend Developer*

- **Improved** investment decision efficiency by **~30%** by integrating AI-powered property insights, including price trends and demand forecasting, through **Node.js REST APIs**.
- Developed scalable dashboards using **React.js, Next.js, and TypeScript**, delivering real-time property analytics across multiple cities.
- **Built** interactive geospatial visualizations using **Google Maps API** and implemented optimized server-side pagination to efficiently manage 10,000+ property records.
- **Reduced** initial page load times by **~25%** through **Next.js SSR** and **lazy loading**, improving dashboard performance and user experience.
- Designed a reusable **TypeScript-based** component architecture with **role-based access control (RBAC)** to support secure, scalable, and maintainable platform expansion.
- **Technologies:** React.js, Next.js, TypeScript, Node.js, REST APIs, Google Maps API

### AI Resume Intelligence & Job Matching Platform — *Full Stack Developer*

- **Engineered an AI-powered** resume intelligence and job-matching platform using **Python, FastAPI, LLM**

**APIs, and REST APIs** to automate resume analysis, candidate profiling, and job matching.

- **Developed** resume parsing and data extraction pipelines to process unstructured resumes and extract structured candidate information, including skills, work experience, education, and qualifications.
- Implemented **LLM-based** resume-to-job matching and candidate ranking logic to analyze job descriptions, calculate suitability scores, generate candidate reports, and recommend relevant positions.
- Built scalable **FastAPI backend** services with **SQL-backed data** models and RESTful APIs, integrating AI/LLM processing with Next.js and React.js frontend applications.
- **Technologies: Python, FastAPI, LLM APIs, REST APIs, SQL, Next.js, React.js**

**Role:** Frontend Developer Intern | **Company:** Gytworkz | **Duration:** November 2023 - April 2024

#### **AI-Powered Medical Motion Tracking** (Nov 2023 – Jan 2024)

- Developed a secure, client-facing video interface using **React.js, WebRTC, and Twilio**, enabling doctors to conduct remote patient assessments.
- **Integrated XtraVision.io** for real-time skeletal tracking, allowing doctors to monitor patient movement live during video consultations.
- **Designed a React.js** appointment calendar with **Day.js**, including validation logic to prevent scheduling conflicts.
- Implemented **Twilio token-based authentication** for secure, real-time doctor-patient video calls.
- **Technologies: React.js, WebRTC, Twilio, Day.js, XtraVision.io**

#### **UniHire Job Portal** (Jan 2024 – Apr 2024)

- **Built** a candidate-facing recruitment platform using **React.js**, enabling profile creation, resume uploads, and filter-based job search.
- **Developed** the resume upload flow with backend parsing integration to validate and auto-populate candidate data, gaining hands-on **MongoDB** exposure alongside a backend mentor.
- **Implemented** a job application and shortlisting flow, allowing candidates to apply directly and hiring teams to review and shortlist profiles.
- **Designed** an interview scheduling system with **Twilio**-based live video interviews, letting shortlisted candidates book a date and time for remote interviews.
- **Technologies: React.js, Redux Thunk, Next.js, Tailwind CSS, Formik/Yup, Twilio, MongoDB**

## **Education**

**DMC (Goa University), B.C.A | Jun 2020 - Jun 2023 | CGPA: 8.7/10**

**Relevant Coursework:** Data Structures, Operating Systems, Discrete Mathematics, Software Testing, Web Technology, Computer Organization and Architecture

# Personal Projects

- **Portfolio Website:** Personal portfolio site showcasing my background, work experience, education, and downloadable resume, built with Next.js. Integrated **EmailJS** to let recruiters contact me directly from the site.

Live: <https://sahil-portfolio-chi.vercel.app/>

- **AI Job Apply:** Built an **AI-powered** job application automation tool using Python and BeautifulSoup to scrape job listings via CSS selectors, automatically applying to relevant positions based on resume-matching logic, processing up to 50 applications per day.

GitHub: <https://github.com/sahilkhattal09/aijobapply>

- **Real Estate CRM:** A CRM web application for real estate sales teams to manage leads and sales data in a single platform, replacing fragmented offline tracking through spreadsheets and paper records. Features Google Sign-In authentication and a dashboard for managing sales and lead data, built with Next.js. Actively expanding core CRM features.
